

## COLUMBIA CABS

From new construction to modernization, Columbia Elevator's selection of elevator cabs includes a wide range of options, materials and features to fit Commercial, Residential and LULA applications. Our cabs are subjected to rigorous, in-plant inspections and certified to be in full compliance with ANSI-A.17-1 (section 2.04) and can bear a UL label to certify code compliance when required.

Perfect for new equipment or modernizations

## InstaFast® - Steel Shells

### INSTAntly FASTen Cab Panels

- Ideal for new equipment or modernization
- InstaFast® joints secure panels in a fast, easy process
- Bolts are accessible from inside of cab platform
- Wall panels secure to base with just a couple of bolts
- Light enough to be handled by one person
- Panels easily fit through existing openings eliminating the need to open walls or for a mechanic to be in hoistway

Customize your shell's interior with our exclusive XChangaCab® packages.

Complete cab interior packages  
Above photo shows install template on left and finished panels on right

## XChangaCab® - Cab Interior Packages

- Ideal for new equipment or modernization
- Installation templates reduce installation time and labor
- Reduces downtime for building owners and tenants during modernization
- Available in plastic laminate, wood veneer, metal, SS#4, bronze or stone
- Materials, colors and patterns complement any design aesthetic
- Low VOC finishes, adhesives and substrates
- Energy-saving low-voltage, long-lasting LED lighting
- Economical solution to increase building aesthetics

Or, install the steel shell with our deluxe laminates applied directly to the panels – with LamiCan®.

Wide variety of finishes applied directly to steel wall panels

## LamiCan® - Laminated InstaFast® Shell

- Plastic laminates, wood veneers or metallic skins applied directly to steel wall panels
- Provides rich appearance of traditional wood core cab or textured metal finish
- “Wood cab” look without the weight of a wood core or hanging panel cab
- Conveniently assembles from inside car for tight-shaft modernizations
- Accommodates additional platform space to make cab ADA-compliant
- Ideal for high-moisture conditions where panel warping is an issue

## InstaCab® - When you need a cab shell NOW!

- In stock and ready to ship standard-sized steel shells
- Prefabricated to meet standard platform sizes and capacities – 2500, 3000, 3500 and 4000 pounds with corresponding-sized doors
- Features exclusive InstaFast® technology for convenient installation
- Ships complete with fan, lighting and all required components to pass Certificate of Occupancy inspection
- Conveniently ships in two separate crates – unhandled components (i.e. cab walls, ceiling, etc.) and cab front
- Shell can be used as a construction hoist to avoid cab panel damage during move-in
